Leverage your company's technological solutions using Standards! Register now for the upcoming CSIO training Workshops at <http://www.csio.com/en/calendar/eventscourses.html>

Would you like to be listed in the CSIONet directory? (No charge): Yes No

If yes do you want: Company Name Telephone No Civic Address

Agreement

By completion of this CSIONet registration form, I fully understand and assume the responsibility for fees for network services that will be invoiced to me by TELUS and/or CSIO on a monthly basis.

Connection Options

1. **VPN Gateway Connection:** Run on top of your Internet High Speed Connection (This is the recommended connection method and deployed by the greatest number of members. If this is your current connection method, we will make no changes to profile. If you would like to convert to a VPN Gateway connection, please contact helpdesk@csio.com as soon as possible to upgrade)

2. **Dedicated Connection:** Use of a dedicated Firewall to connect to the TELUS Firewall. The specifications on the TELUS end are:

Juniper SSG 140 Firewalls:

Firewall throughput (large packets) 350+ Mbps
Advanced Encryption Standard (AES) 256+SHA-1 VPN throughput 100 Mbps
3DES encryption +SHA-1 VPN throughput 100 Mbps
Supported Encryption AES 256, 3DES, DES
HASH Authentication MD-5, SHA-1
Perfect forward secrecy (DH Groups) 1,2,5

The following information is required in order to set this option on the Company/Vendor side:

Internet IP Addresses of both IPSec gateways (VPN Firewalls)
Phase 1 and 2 Encryption Algorithm
Phase 1 and 2 HASH Algorithm
Pre-shared Secret
Local Address of each end of the Tunnel

It is recommended that a new device (Juniper SSG5) be purchased from TELUS via CSIO. If selecting this option, please check the following:

- Please have CSIO order the equipment on our behalf
- We would like to Manage the equipment ourselves
- We would request that TELUS manage the equipment for us
- We will configure our own equipment to meet these specifications and will provide that information to CSIO for TELUS
